## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. The allowed claims are 8, 12 and 13.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest the recitations of the specific features of the system and method for detecting and measuring an analyte, of claims 8, 12 & 13, including especially the following:

The primary reason for the allowance of independent claim 8, is the inclusion of the attribute sensor detecting a condition of the tissue indicative of fluid productivity, and the processor generating a signal to control an amount of suction applied to the harvesting device based on the attribute signal, claimed in combination with the system's harvesting device and analyte sensor.

The primary reason for the allowance of independent claim 12, is the inclusion of sensing an attribute comprising sensing a condition of the tissue indicative of fluid productivity, and adjusting a level of suction applied to the harvesting device for drawing fluid from the tissue into contact with the analyte sensor, claimed in combination with the method's harvesting step, and detecting step.

The primary reason for the allowance of independent claim 13, is the inclusion of continually harvesting biological fluid from the surface of the tissue, and continually detecting the analyte, and continually sensing an attribute proximate to the analyte sensor, and continually adjusting an operational parameter of the device.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
